

MORNING APPEAL

TUESDAY, MAY 20

THE RIGHT TO TAHOE.

The Sacramento Union publishes the following: The people of Nevada have very properly protested against taking Tahoe for the benefit of California ranches and cities. One of our esteemed contemporaries says: "If the waters of Lake Tahoe would be most useful if they were drawn off westwardly, and made to fertilize El Dorado, Placer and Sacramento, Government engineers would be justified in draining them in that direction." Now, by a test of this kind, California has certainly lost all right to the lake. El Dorado county cannot be irrigated by the waters of Tahoe. Beside that she has unlimited quantities of water for irrigation in the smaller lakes west of Tahoe and in innumerable streams which are available for that purpose. Placer county has more water running to waste through her streams and at elevations making them applicable to her lands, than will ever be used. Sacramento county has water in abundance in the American river, taken at Folsom, in the Cosumnes or the Mokelumne. So that the waters of Tahoe are not needed in these localities for that purpose at all; but even if they were, there is more irrigatable land along the line of the Truckee, from Tahoe to Pyramid Lake, than in all the California counties named, and when under irrigation, it is equally valuable with the land in California. Beside this, there is no other water than that of Tahoe available for the fertilization of these lands. The test, therefore, stands strongly in favor of Nevada. Take away the waters of Tahoe and you relegate the lands of the Truckee basin to perpetual aridity; bring the waters of Tahoe to the Western side and reinforce an already superabundance. From the standpoint, therefore, of the greatest good to the greatest number, and the greatest fertilization to the greatest possible acreage, Tahoe should not be interfered with. Moreover, there is neither the quantity of water in Tahoe nor the watershed area around that lake to justify the belief that the water can be brought this way profitably. It is all well enough for engineers, who have in view great water schemes, to postulate the existence of vast watersheds, but the catchment area of Tahoe is already known. Besides the surface of the lake itself, its Western shore is as thin of catchment area as a tin pan. Its Eastern line has about twelve miles of catchment area, with about ten inches of precipitation to be depended upon to fall annually. With this ten inches on the East side, and the catchment area once ascertained, it is very easy to determine how much water the lake affords. It is simply a basin into which the precipitation has fallen, and it is at last a question of the precipitation. There is a vast accumulation of water in Lake Tahoe, and if it were emptied today there would be nothing left but the precipitation upon its catchment area, and that would not be sufficient to fill it again for many years. Estimates of this kind have already been made, and while they will not be presented here and at this time, they are ascertainment which satisfactorily prove that there is not, taking one year with another, sufficient precipitation enough on the catchment area of Lake Tahoe to supply, as Mr. Von Schmidt claims, sixty million gallons a day, the amount which will be necessary for economic use in this State. The people of Nevada should be sustained in their opposition. There is a natural easement of that water through the Truckee. They have the first and the best right to that water. Their opposition to having Tahoe interfered with will receive the commendation of all just minds.

TO KEEP MORMONS OUT.

The New York Tribune says editorially: "An important step was taken recently by the immigration officials at the barge office in reference to Mormons entering the country. There is good reason to believe that immigrants brought here as converts to the Mormon faith can legally be declared to be under contract. Should that prove to be the case, they will be rigidly shut out, and thus the principal

source from which Mormon recruits are drawn would be shut off. Such a result is greatly to be desired by every patriotic American. Hundreds of Mormon converts are brought here from Europe every year. To deprive the so-called church of this supply would be to strike a serious blow at an institution which is a grievous blow upon the fair fame of the nation. By all means keep the Mormons out under the contract labor laws, if possible."

Gov. Waterman of California has telegraphed the World's Fair Executive Committee at Chicago asking that ten acres of space be reserved for California's exhibit, and promising that if the request is acceded that State's exhibit will be one of the features of the fair.

Potts and his wife, the Carlin murderers, will be hung on the 20th unless the Board of Pardons interferes.

Trousers at \$3.50

We are making a specialty of Men's Trousers at this price. We buy and sell by hundreds of pairs, and are therefore able to give extra value for the money. The trousers are neat, shapely and durable, and come in desirable medium and dark patterns. In ordering, state which you prefer. Price \$3.50; by mail, 30c. extra. Give waist measure and length of inside seam of leg.

Our Great \$3.00 Shoes

We have sold over ten thousand pairs of these shoes and with the greatest satisfaction to buyers. Probably the best men's shoe for three dollars in America. Neat, easy-fitting and desirable. May be had in either hook and lace, Congress (elastic sides) or button toes, and with or without toe caps. Price, \$3.00; by mail, 30c. extra.

This same shoe for boys, in sizes 3 to 5, price, \$2.50; sizes 11 to 2, price, \$2.00. The best of school shoes. Postage, 25c. extra.

The great success of the above lines has led us to introduce a ladies' kid button shoe at \$3.00; by mail, 20c. extra. This shoe has low heels, medium toes, and is, withal, such a neat and sensible production that it promises to have a great sale. Sizes, 2 1/2 to 8; widths, A to EE.
